CHAPTER 9
COMMISSIONING, OPERATION AND MAINTENANCE

THIS CHAPTER IS PROVIDED FOR REFERENCE ONLY. IT IS NOT ADOPTED AS A REQUIREMENT OF THE CODE.

SECTION 901
GENERAL

901.1 Scope. The provisions of this chapter are intended to facilitate the acceptance testing, pre- and post-occupancy commissioning, operation and maintenance of buildings constructed in accordance with this code in a manner that is consistent with the intent of other provisions of this code, and to further that goal through the education of building owners and maintenance personnel with regard to related best operating and management practices.

SECTION 902
APPROVED AGENCY

902.1 Approved entity. An approved entity shall provide all of the information necessary for the code official to determine that the agency meets the applicable requirements. The code official shall be permitted to be the approved entity.

902.1.1 Independence. An approved entity shall be objective, competent and independent from the contractor responsible for the work being inspected. The entity shall also disclose possible conflicts of interest so that objectivity can be confirmed.

902.1.2 Equipment. An approved entity shall have adequate equipment to perform the required commissioning. The equipment shall be periodically calibrated.

902.1.3 Personnel. An approved entity shall employ experienced personnel educated in conducting, supervising and evaluating functional tests and commissioning.

SECTION 903
COMMISSIONING

903.1 General. Where application is made for construction as described in this section, the registered design professional in responsible charge or approved entity shall perform commissioning during construction and after occupancy as required by Table 903.1. Where Table 903.1 specifies that commissioning is to be done on a periodic basis, the registered design professional in responsible charge shall provide a schedule of periodic commissioning with the submittal documents that shall be reviewed and approved by the code official.

The approved entity shall be qualified and shall demonstrate competence, to the satisfaction of the code official, for the commissioning of the particular type of construction or operation. The registered design professional in responsible charge and engineers of record involved in the design of the project are permitted to act as the approved entity provided those personnel meet the qualification requirements of this section to the satisfaction of the code official. The approved entity shall provide written documentation to the code official demonstrating competence and relevant experience or training. Experience or training shall be considered relevant where the documented experience or training is related in complexity to the same type of commissioning activities for projects of similar complexity and material qualities.

903.1.1 Pre-occupancy report requirement. The approved entity shall keep records of the commissioning required by Table 903.1. The approved entity shall furnish commissioning reports to the owner and the registered design professional in responsible charge and, upon request, to the code official. Reports shall indicate that work was or was not completed in conformance to approved construction documents. Discrepancies shall be brought to the immediate attention of the contractor for correction. Where discrepancies are not corrected, they shall be brought to the attention of the owner, code official and to the registered design professional in responsible charge prior to the completion of that phase of the work. Prior to the issuance of a certificate of occupancy, a final commissioning report shall be submitted to and accepted by the code official.

903.1.2 Post-occupancy report requirement. Post-occupancy commissioning shall occur as specified in the applicable sections of this code. A post-occupancy commissioning report shall be provided to the owner within 30 months after the certificate of occupancy is issued for the project and shall be made available to the code official upon request.

SECTION 904
BUILDING OPERATIONS, MAINTENANCE AND OWNER EDUCATION

904.1 General. The operations and maintenance and building owner education documents shall be in accordance with Sections 904.3 and 904.4 and submitted to the owner prior to the issuance of the certificate of occupancy. Record documents shall be in accordance with Section 904.2. The building owner shall file a letter with the code official certifying the receipt of record documents and building owner education, operations and maintenance documents. At least one copy of these materials shall be in the possession of the owner and at least one additional copy shall remain with the building throughout the life of the structure.

904.1.1 Owner responsibility. Buildings built under this code shall be maintained and operated at the level of performance required by the approved documents.

904.1.1.1 Periodic reporting. Where required by Table 303.1, a report confirming that the building is maintained and operated at the level of performance required by the approved documents shall be submitted to the code official at approved intervals.

### Chapter 4: Site development and land use

- **Natural resources and base line conditions of building site**
  - X None Report With permit submittal None 402.3.1
- **Landscape irrigation systems**
  - X None Field inspection Installation None 402.3.3
- **Topsoil and vegetation protection measures; setbacks from protected areas**
  - X None Field inspection and report Installation of measures, prior to other site disturbance None 402.3
- **Imported soils**
  - X None Field inspection and report With permit submittal; After all fill operations complete. None 402.3.5.5
- **Soil restoration and reuse**
  - X None Field inspection and report Preparation and replacement of soils None 402.3.5.4
- **Soil percolation test**
  - X None Field inspection and report Prior to installation of gray water irrigation system None 406.2.2
- **Storm water management system operation**
  - None X Field inspection Installation 24 months 402.3.2
- **Erosion and sediment control**
  - X X Field inspection Installation Periodic for 24 months 402.3.6
- **Hardscape and shading provided by structures and vegetation**
  - X X Field inspection and report Installation of protective membranes, base materials, soils and vegetation 24 months 404.3.2
- **Vegetative roofs and terraces**
  - X X Field inspection and report Installation of protective membranes, base materials, soils and vegetation 24 months 404.3.2
- **Site lighting**
  - X None Testing and report Installation None 405

### Chapter 5: Materials

- **Moisture control (Section 506.3)**
  - a. Foundation sub-soil drainage system
    - X None Field inspection and verification Periodic inspection for entire sub-soil drainage system. None 506.3 and IBC Ch 18
  - b. Foundation damp-proofing and water-proofing
    - X None Field inspection and verification Periodic inspection for entire foundation. None 506.3 and IBC Ch 18
  - c. Flashing at: Windows, exterior doors, skylights, wall flashing and drainage systems.
    - X None Field inspection and verification Periodic inspection for not less than a percentage determined by design professional in responsible charge of all flashing locations. None 506.3 and IBC Ch 14
  - d. Exterior wall coverings.
    - X None Field inspection and verification Periodic inspection for not less than 25% of exterior wall cladding systems. None 506.3 and IBC Ch 14

### Chapter 6: Energy

- **Energy consumption, monitoring, targeting and reporting**
  - a. Monitoring system
    - X None Inspection and verification During construction and prior to occupancy None 604
  - b. Calibration
    - X X Testing and review and evaluation or test reports During commissioning Annually 604, 611

### Mechanical system completion— all buildings

- **a. Air system balancing—provide the means for system balancing**
  - X None Inspection and verification During construction and prior to occupancy None 612.1.2.1 and through reference to IECC
- **b. Hydronic system balancing—provide means for system balancing**
  - X None Inspection and verification During construction and prior to occupancy None 612.1.2.2 and through reference to IECC
- **c. Duct system testing**
  - X None Testing, testing report and verification of results During construction and/or at final inspection. None 613.5.3 and through reference to the IECC
- **d. Mechanical system manuals – construction documents to require O&M manual**
  - X None Verification of construction documents Plan review None 612.1.5.2

### 904.2 Record documents.

The cover sheet of the record documents for the project shall clearly indicate that at least one copy of the materials shall be in the possession of the owner and at least one additional copy shall remain with the building throughout the life of the structure. Record documents shall include all of the following:

1. Copies of the approved construction documents, including plans and specifications.
2. As-built plans and specifications indicating the actual locations of piping, ductwork, valves, controls, equipment, access panels, lighting and other similar components where they are concealed or are installed in locations other than those indicated on the approved construction documents.
3. A copy of the certificate of occupancy.

### 904.3 Building operations and maintenance documents.

The building operations and maintenance documents shall consist of manufacturer’s specifications and recommendations, programming procedures and data points, narratives and other means of illustrating to the owner how the building, site and systems are intended to be maintained and operated. The following information shall be included in the materials, as applicable to the specific project:

1. Directions to the owner or occupant on the manual cover sheet indicating that at least one copy of the materials shall be in the possession of the owner or occupant and at least one additional copy shall remain with the building.
2. Operations and maintenance manuals for equipment, products and systems installed under or related to the provisions of Chapter 4 including, but not limited to, the following, as applicable:
   2.1. Vegetative shading, vegetative roofs and natural resource protections and setbacks.
   2.2. Water-conserving landscape and irrigation systems.
   a. Storm water management systems.
   b. Permanent erosion control measures.
   c. Landscape or tree management plans.
3. Operations and maintenance documents for materials, products, assemblies and systems installed under or related to the provisions of this code for material resource conservation in accordance with Chapter 5 including, but not limited to, the following, as applicable:
   3.1. Care and maintenance instructions and recommended replacement schedule for flooring including, but not limited to, carpeting, walk-off mats and tile.
3.2. Care and maintenance instructions for natural materials including, but not limited to, wood, bio-based materials and stone.

3.3. Available manufacturers’ instructions on maintenance for:
   3.3.1. Exterior wall finishes.
   3.3.2. Roof coverings.
   3.3.3. Exterior doors, windows and skylights.

3.4. Information and recommended schedule for required routine maintenance measures including, but not limited to, painting and refinishing.

3.5. A copy of the service life plan required by Chapter 5.

4. Operations and maintenance documents for equipment, products and systems installed under or related to the provisions of this code for energy conservation in accordance with Chapter 6 including, but not limited to, the following:

   4.1. Heating, ventilating and air conditioning systems, including:
       4.1.1. Recommended equipment maintenance schedule.
       4.1.2. Air filters and fluid filters, including recommended replacement schedule and materials.
       4.1.3. Time clocks, including settings determined during commissioning.
       4.1.4. Programmable controls and thermostats, including settings determined during commissioning.

   4.2. Domestic hot water systems, including performance criteria and controls.

   4.3. Building thermal envelope systems, including:
       4.3.1. Glazing systems inspection schedule.
       4.3.2. Performance criteria for replacements and repairs.
       4.3.3. Information and recommended schedule on required routine maintenance measures including, but not limited to, sealants, mortar joints and screens.

   4.4. Electrical and lighting systems, including:
       4.4.1. Technical specifications and operating instructions for installed lighting equipment.
       4.4.2. Luminaire maintenance and cleaning plan.
       4.4.3. Lamp schedule, recommended relamping plan and lamp disposal information.
       4.4.4. Programmable and automatic controls documentation, including settings determined during commissioning.

4.4.5. Occupant sensor and daylight sensors documentation, including settings determined during commissioning.

4.5. Automatic demand reduction systems.

5. Operations and maintenance documents for equipment, products and systems installed under or related to the provisions of this code for water conservation in accordance with Chapter 7 including, but not limited to, the following:

   5.1. Domestic fixtures.
   5.2. Water regulating devices, including faucets and valves.
   5.3. Irrigation and rainwater and gray water catchment.

6. Operations and maintenance documents for equipment products and systems under or related to the provisions of this code for indoor environmental quality in accordance with Chapter 8 including, but not limited to, the following:

   6.2. Green cleaning products, procedures and techniques.
   6.3. Recommended window cleaning schedule.
   6.4. Ventilation controls.
       a. Floor finishes.
       b. Fireplaces and combustion appliances.
       c. Radon mitigation system.
       d. Indoor plants.

904.4 Building owner education manual. The owner shall cause to be assembled an informational document on the building, site or structure and systems and sustainable features that are covered by this code and included in the building. Such information shall be educational in nature and sufficient for future tenants, owners and operators of the building, building site, structure and systems to understand the basic purpose and basis for these systems and features and how they are to be maintained for continued performance. The education documents shall consist of a statement of performance goals or requirements and a narrative illustrating the reasoning behind the building’s site, features and systems design. One copy of the owner education manual shall be in the possession of the owner and one additional copy shall remain with the building throughout the life of the structure.
